

## Foundation Learning - a briefing and workshop for Skills for Life managers and practitioners

21<sup>st</sup> January, 10am - 12.30pm

Essex PDC, Anglia Ruskin University, SAW005

Trainer: Julie Furnival

Foundation Learning is the name given to education provision at Entry Level and Level 1. Learners will be offered personalised learning opportunities that help them gain credit at Entry Level and Level 1. What will this mean for Skills for Life programmes? What will it mean for learners with learning difficulties and disabilities?

To find out the answers to these questions, and much more besides, you are invited to attend a free briefing and workshop at Essex PDC. By the end of the session, you will have:

- Examined the relationship between Skills for Life and Functional Skills, and the role of Functional Skills within Foundation Learning
- Discussed the Qualifications and Credit Framework and its advantages for Foundation learners
- Discussed true/false statements about Foundation Learning, QCF, Skills for Life and Functional Skills
- Used a range of tools to build possible learning programmes for SfL and/or LDD learners
- Identified resources for Foundation learners
- Drawn up a 'What next' plan for use within your own organisation.

This workshop and briefing is being delivered as part of the Foundation Learning Support Programme.
