This free training course aims to introduce you to the content and structure of the recently revised interactive Adult Numeracy Core Curriculum, explore some principles and practical approaches in adult numeracy teaching and recommend some useful websites and resources for numeracy support

This course is valuable for:

Newly appointed Skills for Life tutors; learning support assistants; vocational trainers involved in the delivery of embedded numeracy support.

(This event is not suitable for experienced Skills for Life tutors)

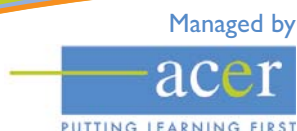

Day 1 topics:

- purpose & structure of the interactive Core Curriculum
- understanding and using the CC reference system
- teaching strategies to develop calculation skills.

Day 2 topics:

- understanding key factors that affect numeracy skills development
- developing active learning approaches to numeracy
- using the Core Curriculum when planning teaching and support sessions.
